**ANNUAL CERTIFICATE OF COMPLIANCE AS REQUIRED BY SECTION
64.2009 (E) OF THE RULES AND REGULATIONS OF THE FEDERAL
COMMUNICATION COMMISSION**

I, Larry Sisler, am the Managing Partner of Mountain Communications LLC d/b/a Procom and in that capacity I have personal knowledge of the operations of the Company, that the Company has established operating procedures that are adequate to safeguard its customer proprietary network information and, in support of this Certificate, the Company has attached a Statement explaining its operating procedures to insure compliance with the rules as set forth in 47 CFR Ch. 1 § 64.2009

**ANNUAL STATEMENT OF COMPLIANCE AS REQUIRED BY
SECTION 64.2009 (C) OF THE RULES AND REGULATIONS OF THE
FEDERAL COMMUNICATIONS COMMISSION**

Mountain Communications LLC, d/b/a Procom (the "Company") has identified three primary areas that, on a daily basis, handle customer proprietary network information ("CPNI"), namely, Billing, Engineering, and Customer Service. All individuals in those departments are required to abide by the Company's Privacy Principles and are educated by the Company concerning Section 222 of the Communications Act of 1934 and the requirements therein.

The education entails: (1) identifying specific customer information that must remain secure, such as usage amounts, calling patterns, and customer specific network design; (2) the proper use, storage and dissemination of this information; and (3) inquiring when doubt exists regarding the type of information that has not been previously discussed.

In addition to the above, the Company uses proprietary, multi layered security codes to protect customer information. Only the department directors and the corporate officers possess the code sheet and the dissemination of the sheet is strictly prohibited. No single individual has end-to-end control of the master code list. Without the end-to-end master control list, customers of the company appear solely as a number. If information is accidentally released at any layer, the information does not readily translate into a specific customer profile.

The Company believes that the combination of education and the level of the security coding of customer identities provides sufficient security for CPNI
